WORK OF TERRITORIAL SURVEY DEPARTMENT

Surveyor W. W. Wall Makes Interim Report to Governor Carter of This Year's Operations to Date.

Walter E. Wall, Surveyor of the Territory, has made an interim report to Governor Carter of the work done by the Survey Department between January 1 and April 27 of this year. The Governor expresses himself as being agreeably surprised at both the amount of work done by that department and its great value to the Territory. Some of the details are of much public interest, such as those relating to homesteads and to city improvements in Honolulu and Hilo.

HONOLULU CITY WORK.

For every one of the four months Honolulu city work has been carried on, comprising street lines and grades for buildings, curbs, street construction, Rapid Transit Co.'s tracks, etc. Street monument work has also been steadily advanced. The old way of erecting stone pillars at street corners has proved unsatisfactory, as private owners would sometimes remove the landmarks in making their own improvements. Monuments are now being placed in the streets, on lines parallel with street bounds. They consist of pieces of pipe enclosing copper bolts. Data concerning them are kept in the office and the monuments serve also as bench marks from which to calculate elevations.

Work was done in January on Bates street grade and lines, but the construction was discontinued. In February a survey, plan and description were furnished for the new site for Government stables at Kewalo, also a profile and cross section for grades of School street extension. More was done in the last-mentioned work in March, when also surveying was done at the Palama pumping plant and levels for the grading of Young street were given. The present month, April, the Kapahulu and Monsarrat roads were located amongst other street construction surveys.

HILLO TOWN.

General detail street work in Hilo has been going on all the time mentioned. City block maps for Hilo have been in preparation, anticipatory of the projected sewer system. A reduction of detail maps of the town to a single map of the entire plot formed part of the operations. In February work was done on Pitman street extension to Puueo and Wainaku, also on Piopio street traverse. The April record shows progress on contour map of street system and profile grade maps of street, together with a plan of Hilo park for the landscape gardener.

HOMESTEADS, ETC.

Government remnants in Kaneohe, Oahu, were in January located and platted, a description of them being furnished to the Commissioner of Public Lands. Similar work was done with respect to a Government land remnant at Honolulu, Kona, Hawaii.

Surveys of homesteads in Laupahoehoe, Hawaii, were begun the middle of January and have been carried on to map and descriptions in April. Descriptions of Alae homesteads, on Maui, and Puna and Kaimu homesteads, on Hawaii, were made and checked the first month. The upper Olaa and the Puna homestead descriptions were checked in February.

"Pupukea-Paumalu survey in progress," is a note appearing for February, which refers to an important discovery of homestead lands on this island. They consist of two tracts of good land aggregating 4000 acres just northeast of Waimea Bay, and the Oahu railway runs through the lower portion on the seashore. The map was finished this month.

Map and data of Kamale homestead lands, Hawaii, were completed in January.

OTHER PUBLIC LANDS.

A calculation, map and description were made in January of Kaipapau Valley, Oahu, which the former administration agreed to give to Jas. B. Castle in exchange for land needed for street widening. The sides of the valley are very precipitous, a serpentine stream coursing along the bottom.

A study was made the same month of the Manoa-Tantalus boundary, to determine a certain claim of the Bishop Estate. It resulted in deciding that the boundary runs along the pali ridge, giving all the flat lands to the Government beyond dispute.

In January also the Insane Asylum premises were surveyed and a plan thereof completed, showing kuleanas, taro lands, buildings, trees, etc. A survey and description of the Board of Health lot at Kapalama leased from the Bishop Estate were furnished. The cultivated lands on Round Top slopes

were located and platted, a tracing thereof being furnished to the Superintendent of Public Works. These lands are occupied by squatters.

On Lanai a boundary was run near Maunalei, showing that the water source was on Government land, instead of private land as had been supposed. This makes an important difference in fixing the rental.

Field work in Pololu valley, Kohala, was finished in February, and the map in March.

A title study was made in April of the Ill of Kahaumakaawe, Manoa valley, for defining the line between the Government and the Bishop Estate. It is yet pending a decision.

OFFICE WORK.

An important work was undertaken in March, at the instance of the Superintendent of Public Instruction, being a projection sheet for a group map of the Hawaiian Islands. All of the old works of this kind have become obsolete, excepting the sea charts and these are not all that is wanted. The lack of such a map is particularly felt in the schools.

Tracings so many that it would be tedious to enumerate them have been furnished to other departments of the Government, as well as to the Land Registration Court.

The Water Works Bureau has been supplied by the Survey Department with a blue print from a compiled tracing of the city of Honolulu, on which the entire water distribution system may be marked.

No less than twenty descriptions of street widenings were furnished to the Public Works Department, and fifteen of homesteads to the Land Office, these in March alone. Blue prints included those of Tantalus Park reservation, School street extension, Kaili detention camp, reservoir and quarries and proposed Normal school site.

Among tracings furnished, one particularly noted is of the Island of Niihau for the United States Coast and Geodetic Survey. When Prof. W. D. Alexander was making triangulations on Kauai for determining the location of Niihau, the Territorial Survey sent a man along with him.

All the time work is going on indexing the data of the office. Grants and deeds are plotted on office maps, this work being kept up to date.

SPECIAL WORK.

The present month a survey of Waikiki beach has been made, to locate the various bulkheads and seawalls along it. There is a lawsuit pending between the Government and a private owner with regard to beach line title.

Meteorological records have been kept up to date and the last annual report thereof is in press. The Federal Government will take charge of this division on July 1. Tide gauge records and sun observations for time have been maintained.

MARCH WAS VERY HEALTHFUL MONTH

"Very good" to "fair" covers the health conditions for March as reported by the Government physicians throughout the Territory.

Whooping cough is the only malady that may be said to have been considerably prevalent, being reported from Wailua, Oahu; Lahaina, Makawao and Hana, Maui, and North Kohala, Hawaii.

Conjunctivitis has been very prevalent in Ewa district, Oahu. Olaa, Hawaii, had about 250 cases of influenza. There were ten cases of typhoid in North Hilo, Hawaii. The Waikuku physician once more requests that a sanitary inspector for that town be appointed, arguing that Hilo has one.

Twenty-two physicians answer "no" and two are silent to the question, "Is tuberculosis increasing in the district?"

On the whole the medical reports for twenty-four districts, as tabulated by Registrar Lawrence, show a wonderfully high degree of healthfulness of the racially mixed population of the Territory. This, too, is for about the most inclement month of the year, and March last past was more than ordinarily changeable in its weather.

Three warrants for \$27,825, being the amount of the subsidy due the Oahu Railway Co., were paid by Treasurer Campbell yesterday.

APPROACHING THE VERDICT

The Voucher Destroying Case Goes to Jury This Morning.

After the prosecution had rested in the trial of Solomon Meheula for destroying vouchers of the House of Representatives while its clerk, Mr. Ashford moved for a directed verdict in favor of the defendant. The main ground of the motion was that proof had not been made that the vouchers alleged to have been destroyed had ever existed.

Judge Dole overruled the motion, holding that defendant's own admissions made it a case to go to the jury.

John H. Wise, the first witness for the defense, testified that the vouchers and other documents were loosely kept upon the House clerk's desk and therefore might easily have been abstracted or lost. A cross question by Mr. Dunne, to ascertain if the witness was not the endorser of a warrant for which the voucher is missing, was shut out upon objection.

Other witnesses subpoenaed for the defendant were Speaker Beckley, Assistant Clerk Makainai and Janitor Paoloo, officers of the House. Defendant also testified in his own behalf. The case is ready for presentation to the jury this morning.

Andrew Adams, member of the grand jury that indicted Meheula, resumed his evidence for the prosecution yesterday morning. He testified among other things that Meheula brought the books of vouchers before the grand jury and stated there, in reply to questioning, that all of the vouchers were contained in the volumes. When asked about No. 501, which was in Meheula's favor for \$50, he replied that it was probably for salary, but the remark was made that this could not be so, as there

were other vouchers for all of his salary at \$10 a day.

Witness further said that Meheula testified that it was his custom to draw warrants only on vouchers approved by the chairman of the committee incurring the expense and by that of the committee on accounts. When Meheula's attention was drawn to some vouchers that bore no evidence of such formalities, Meheula told the grand jury that he had sometimes issued warrants without having vouchers. Witness identified twenty-two such irregular vouchers. As to keeping the vouchers in his custody, which he informed the grand jury he had done since the legislative session, Meheula told the grand jury he considered them the property of the committee on accounts, and further that he would not yield them up to newspapermen because he thought they would be used to help in disfranchising the natives. Being asked how the vouchers could be put to such use if they were aboveboard and honorable, Meheula made no reply to the grand jury.

An Advertiser reporter and Geo. F. Henshall of the Star were called, after Mr. Adams concluded, both testifying to interviews with Meheula in which he maintained that the vouchers belonged to the committee on accounts and were not, at the times interviewed, in his possession.

Henry Hapal, Registrar of Public Accounts, went over the bunches of warrants in court, identifying those for which vouchers are missing.

BURNS AND CUTS.—Slight injuries of this character are of frequent occurrence in almost every household. While they are not dangerous, except when blood poisoning results from the injury, they are often quite painful and annoying. They can be quickly healed by applying Chamberlain's Pain Balm. It allays the pain almost instantly and heals the injured parts without matter being formed, which insures a cure in one-third the time that the usual treatment would require. It is the most perfect preparation in use for burns, scalds, cuts, bruises and like injuries. It should be applied with a feather, and before the parts become swollen if possible. For sale by All Dealers and Druggists. Benson, Smith & Co., Ltd., Agents for Hawaii.

Arrangements are being made for a farewell dance and reception to be given at Camp McKinley Monday evening in honor of the departing artillery companies. Governor Carter has granted the request for the band to play at the reception.

WALTHAM WATCHES.

The American Waltham Watch Company, Waltham, Mass., U. S. A., is the largest watch manufacturing concern in the world. The buildings have a frontage of 769 feet, with numerous wings which, if placed end to end, would extend 2,827 feet, or more than half a mile. The floor space is about six acres. The daily product of this factory is 2,700 finished watch movements, and more than 11,000,000 Waltham Watches are now in use.

All Waltham Watches are guaranteed.
